How to measure your feet?

- Measure the length and circumference of your feet in centimeters and send us the larger measurement (because one foot is usually slightly larger than the other).
- Also tell us your usual size so we can provide you with the most suitable size.
- If you buy shoes to keep in stock and resell, tell us directly which sizes you want.

How To Measure Your Feet's Circumference

Please give us your feet's width in centimeters, which is the circumference of your foot at it's widest point.
